

Procurement of automatic Frequency Restoration Reserve (aFRR) in the first half-year 2018

The Nordic TSOs have decided to procure a total volume up to 300 MW during weekdays (Monday to Friday) in the first half-year 2018. The TSOs will continue to procure aFRR in the morning and evening hours where the frequency variations are most challenging.

There will be a pause in the aFRR procurement in week 52/2017 and the procurement will start again on Tuesday 2 January 2018 containing following hours for the first half-year:

- weeks 1-8, morning hours 4:00-8:00 (CET), evening hours 16:00-19:00 (CET)
- weeks 9-13, morning hours 4:00-8:00 (CET), evening hours 17:00-20:00 (CET)
- weeks 14-26, morning hours 4:00-8:00 (CET), evening hours 21:00-24:00 (CET)

The total number of hours will be increased compared to previous years.

Information about the procurement for the rest of year 2018 will follow later.
